

## WELCOME TO PRECIOUS LEARNERS WORLD Nursery and Kindergarten

Let your Precious Ones Explore the Fantastic, Colorful, Vibrant World of 'Precious Learners World'. It's truly a treat to your child as we focus on a Play and Learn Philosophy, where your child can explore, get creative, be imaginative, enjoy, make new friends and learn. With the world of crafts, colors, books, experienced teachers and caretakers they are going to be their own Leaders.

Our Precious Leaders start with us at a small age of 1.5 years and stay till 6 years old. We are accredited and follow the International Preschool Curriculum. The curriculum is based on proven and peer reviewed concepts that include play, inquiry and objective based learning styles. This curriculum is the globally followed by more than 100 schools worldwide which speaks of its diversity, international culture approach and acceptance. We are committed to providing a global learning platform to your Precious One's and have complemented that with activities, resources and a natural green environment with fresh air and open spaces.

## OUR TEACHERS AND STAFF

Our Teachers are experienced, carrying many years of international experience and they are native and multinationals which adds a breadth of diversity and exposure to our learning and playing environment. We also have our psychologist on board. Our staff and caretakers work tirelessly to make sure that each child has a great fantastic playful learning experience. Together we are one Precious Learners World family dedicated to making each day a Precious day in their lives.

## Our Secure and Safe Environment

There are CCTV cameras around the premises and utmost care and design has been incorporated inside the building and outside in the open spaces and playground for the safety of the children. For example, rubber coverings on sharp surfaces, lowered hand rail for climbing stairs, fenced outdoor areas, locked fenced gates, sealed plug outlets, secured access and more.

## PLAYGROUUPS and Afternoon/Weekend Clubs

Every Monday, Wednesday and Friday we have structured thematic playgroups from 10 am to 12 noon. Each day a theme is introduced and parents and children play and work in tandem while enjoying all the fun activities, arts and crafts and role plays. These playgroups are an additional highlight that complement the experience at Precious Learners World. There are also Afternoon and Weekend clubs that would include Cooking, Ballet, Martial Arts, Swimming and more that are in the pipeline to further augment the family bondage and child's development.

## Garden to Table

Planning and creating a garden with Kindergarten children is a fun learning experience with many benefits. Gardening encourages self-awareness, positive teamwork and connections with our environment.

We engage our families in this marvelous learning experience through gardening workshops and shared meals, using homegrown vegetables.

## Why create a school garden?

- Gardening brings your child closer to nature promoting wellness.
- Gardening gives your child a love for healthy foods.
- Gardening gives your child an opportunity to become an ambassador for our environment.
- Gardening helps your child develop into a balanced person. Creating opportunities for positive development of mental and physical health.

Precious Learners World is passionate about helping children develop healthy lifestyle choices through meaningful learning opportunities. We incorporate the "NEW START" kindergarten curriculum into our "Garden to Table" club activities.

## Promoting:

- Nutrition** Healthy foods rich in vitamins
- Exercise** Exercise makes our bodies strong and our brains think better!
- Water** Clean water to refresh our bodies instead of sugary drinks!
- Sunlight** Enjoying time in the sun to get Vitamin D!
- Temperance** Encouraging Healthy habits instead of sugary treats!
- Air** Breathing fresh air under the trees to encourage a healthy body!
- Real** Important for learning, growing & promotes positive attitudes!
- Trust** Encouraging healthy social relationships!

The habits children develop continue throughout their life. "Garden to Table" helps children develop healthy lifestyle choices through a fun learning experience. Your child will benefit by developing a healthier immune system, better balance & coordination and a enhanced ability to concentrate in their classroom learning.

Through the pleasure of growing and cooking fresh vegetables children will develop pride in their learned skills. All gardening and cooking lessons are specially prepared with engaging, age appropriate activities and recipes. Each recipe the children make incorporates home grown organic vegetables from their garden. Sample cooking lessons include: "Little Rainbows", "Monster Sandwich", "Too Much, Too Little, Just Right"
